

City Year's mission is to help students and young adults succeed. We fulfill this mission by training and deploying diverse teams of AmeriCorps members, or simply Corps members, ages 18-25 years old, to serve as Student Success Coaches for a year in systemically under-resourced schools in 29 cities across the country. Corps members provide a holistic range of services to help students graduate from high school prepared for college and career success.

Our \$25K+ Sponsorship Program, also known as a "Program Sponsorship," offers a unique opportunity for partners to support specific components of our school services, such as math, literacy, or improving attendance to keep students on track to graduate from high school. We match your sponsorship of City Year school services with your mission, such as strengthening students' social and emotional development or building their skills in science, technology, engineering, and math (STEAM).

**17:1** Every \$1 of federal taxes invested in AmeriCorps and Senior Corps returns over \$17 to society, program members and the government.
